Welcome to Spanish in Nature. We hope you find it useful and decide to come to see us in our Spanish home/school in the wonderful Guadarrama National Park. El Boalo. Madrid. Spain.

### ABOUT US:

Our family **home**, the house where I live with my husband (Spanish teacher) and my 3 children, **will be your Spanish home/school** where you can learn the Spanish language and **enjoy** our house and **environment** and will be the best Spanish school that you will ever see.

We believe that learning a language **can't be confined** to the classroom, therefore our Spanish home/school is the ideal place **where we mix study and fun in nature**.

### LOCATION:

**Spanish in nature** is located in **El Boalo**, Madrid. In the heart of **Guadarrama National Park**, and only 30 minutes drive to **Madrid city**.

The Guadarrama Mountain range contains some ecologically valuable areas, located in the Community of Madrid.

In this area or region there are other two parks.

The **Peñalara Natural Park** (*Parque Natural de la Cumbre, Circo y Lagunas de Peñalara*) is a **natural park** in the northwest of the Community of **Madrid**, declared a natural park in June 1990.

The park is situated in the central zone of the Sierra de Guadarrama. The reserve includes **Peñalara's summit, the highest peak of the mountain system**.

One of the most interesting elements of the reserve is the **Peñalara cirque**, created by a **glaciar**. It is located between the summit of Peñalara and the Younger Sister, on the eastern slope of both peaks. In the Park there are 20 small lakes of glacial origin in a relatively level area between 2000 and 2200 meters.

The park is home to the **black vultures** and the **Spanish Imperial Eagle**, and also many small mammals and amphibians.

The park is especially popular for **hiking, mountain climbing and skiing**.

**La Pedriza Regional Park** (*Cuenca Alta del Manzanares Regional Park*), which was created

in the 1908s. The area covered by the Regional Park, the upper Manzanares River basin, was designated in 1992 as a [Biosphere Reserve](#) by UNESCO

**La Pedriza is a geological feature** of great scenic and leisure interest. It is located on the southern slopes of the **Guadarrama mountain range**. It is one of the **largest granite ranges of Europe** and holds numerous peaks, rocky cliffs, streams and meadows, with the majestic Yelmo as reference.

More than **two thousands rock climbing routes of all difficulties** are available to rock climbers. **Hiking** is also popular in La Pedriza.

The 32 square kilometres occupied by La Pedriza lie within the Regional Park of the High River basin of **Manzanares**, the largest park of the Community of Madrid. In this zone, vegetation is sparse, but there are Mediterranean shrubs like the **rockrose**, and alpine varieties like fabaceae. The fauna is rich in **birds of prey**; the breeding colony of over 100 pairs of **Griffon Vultures** is the largest in the Madrid area and there are herds of **mountain goats**.

### FACILITIES:

The home/school is a small school with **capacity for up to 20 pupils, in groups from 6 to 8 pupils**, with three course levels: Beginner,

Intermediate or Advanced.

### ACOMODATION IN SUMMER CAMP

In Spanish summer camp we are very lucky, our town is small, I have 3 children and we meet many host families. This situation lets us have great host families where children are treated as members of the host family and children are really happy. As a mother myself, I care for the well being of your children. We have contact everyday with the host family because they bring children to and collect them from our Spanish school.

The children have breakfast with the family, the family prepare a packed lunch for the child to have lunch in the Spanish school-camp and they have dinner together with the host family in the evening. Sunday is a family day;

students are with their host family all day long.
